

IN THE SPECIFICATION

Please amend the paragraph beginning at page 12, line 14, as follows:

Figure 4 shows an example of a Concrete Resource Model for a scientific computing cluster service described in Figure 5. In this system every server (depicted in Figure 5 as a box) is connected to a designated Admin VLAN 801. A free server 815 has all of its other NICs connected to a designated Free-pool VLAN 803. A customer domain service environment [[813]] 815, is a scientific computing cluster environment which includes a single master server 809, connected to both a front end VLAN 805 and a back end VLAN 807, and a set of worker servers connected to the back end VLAN. Both Master and Worker servers are also connected to the Admin VLAN.
